

STREAMLINING DISCOUNT COMPARISONS

# Better Rx prices for pharmacies and consumers.

For too long, the process of comparing multiple prescription discount programs has frustrated pharmacists and consumers, and created operational challenges.

## But that's changing.

By searching for a drug in the updated My Prescription Savings portal, pharmacists and techs now have the power to easily choose between two options and deliver the best price.

There are no enrollment or flat fees, and the transaction fee is always \$0.37.

The result? Lower Rx costs for customers, streamlined pharmacy workflows, and greater clarity over operations.

With My Prescription Savings Card, pharmacies can easily choose from two options to offer the best Rx price.

If you have any questions,  
please contact your McKesson  
pharmacy representative.
